

Comparison Between Moodle LMS and Enhance LMS

| S.No. | Moodle LMS | Enhance LMS |
|-------|--|---|
| 1 | Moodle LMS is an open source system written in PHP. | Enhance LMS is a proprietary application developed by team Enhance. Software used for development are .Net for the development and SQL in the backend |
| 2 | Moodle LMS was originally designed for the education market and lack some of the key features needed for workplace learning for e.g. organization hierarchies etc. E-Learning is a part of the entire flow. | Enhance LMS is meant for online training and training department of the companies to deliver online training to adult learners in the absence of an Instructor. E-learning is the whole point. |
| 3 | Open Source like the Android System. Multiple versions and multiple upgrades can be confusing for users. Upgrading nightmare. Once Moodle is customized even slightly, upgrading the version of Moodle and migration of customization from your version to the new version is a nightmare. | Controlled, solid like the iOS environment. Since the system is built in-house, we keep in mind that we will have to offer upgrades to our customers. We consider the pros and cons as our product road-map evolves. We can help you migrate or upgrade the system in a systematic and controlled manner. |
| 4 | One of the major hurdle in the open source technology is the security of the application. The application is very vulnerable to security threats. | Our application is more secure and self-developed so all the loopholes can be handled at ease |
| 5 | In-built reports are complex and creating custom reports is also complicated and expensive because of the sheer breadth of the system. Massive testing is required | We have specific in-built reports which are simple to retrieve. We can customize reports easily and also present it in a user friendly manner. |
| 6 | Branding and getting your organization's look and feel in Moodle can be another monetary affair. | Basic Branding for providing Enhance LMS does not incur any additional cost |
| 7 | Enhanced dependency on PHP developers. Difficult to switch vendors and also since it is open source, no single person can take responsibility for the system. | Our company develops and supports the system with full responsibility to support the system. |
| 8 | Need to buy storage space from a separate hosting company. | We provide an option to take care of hosting at our end itself. |

| | | |
|----|--|---|
| 9 | It is a massive system with 100s of features. A lot of which is not required by most users. It is 'multiple things for multiple people' so it may not be exactly what you need and it is tough to just keep what you need. It requires extensive customization and testing to turn specific features on and off. | Advanced system with focus on online delivery of eLearning. We can customize and add/remove what you need. Built for you; as per your requirements. |
| 10 | Takes a little tech savvy - Not just any trainer or teacher can download Moodle and be up and running with a quality LMS. It takes a little tech savvy and access to IT Dept. resources to implement. | Enhance system is very easy to maintain and manage. Even non tech savvy team can manage the system with the simple training |
| 11 | The powerful thing about Moodle is that you can download and install it yourself, but what you don't have is any support. most support is in the forum based, and if someone in the community is not interested in your problem it's often hard to find a solution. | Enhance has a team which works as a support system for the LMS and handles all the raised queries on timely basis |
